REPLIC·READ

Server configuration

Here you can perform configuration changes that impact the way the server regulates data, accounts and more.

Replic configuration

Limit creation to authenticated clients
Set whether only users that are logged into an account can create replics.

☐ Require account to create replic.

Allowed access-levels
Set which access-levels can be used by owners to configure a replic. At least one needs to be selected.

☐ **None:**   All users can acces a replic without constraint.

☐ **Password:**   The owner can set a password, that needs to be entered to access a replic.

☐ **Authenticated:**   Only users that are logged in can access a replic.

Require expiration date
Set a maximum length for which a replic can be accessible.

☑ **Require expiration date**

Maximum length
🕐 Max. length   ▼

Replic limit
Set a limit for how many replics a user can create in a given timespan. **Note:** This limit works only for users that are logged in. If anonymous users are allowed to create replics, the enforcement of this limit may not be possible.

☑ **Limit replic creation**

Allow creating   [Amount]   distinct replics per   [Unit ▼]   .

Account configuration

Require email verification
Set whether users must verify their email after signing up, or when changing their email. This does not affect users that already exist.

☑ Require email verification
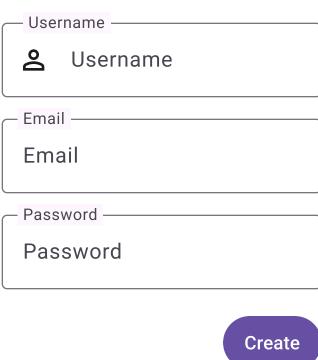

Allow account creation
Set whether accounts can be created by anyone. Disabling this options forbids users from signing up.

☑ Allow signing up

Create account
Create an account. This is useful when "Allow signing up" is disabled but you want to provide an account to a user. You can configure this account to not need to verify its email address.

☐ Require email verification
