Server configuration

Here you can perform configuration changes that impact the way the server regulates data, accounts and more.

Replic configuration

Limit who can create replics
Set which users can create replics.

- ⦿ **All:** Every user can create replics
- ○ **Account:** Only logged-in users can create replics
- ○ **Verified:** Only users with a verified account can create replics

Limit who can access replics
Set which users can view replics created by other users.

- ⦿ **All:** Every user can access replics
- ○ **Account:** Only logged-in users can access replics
- ○ **Verified:** Only users with a verified account can access replics

Require expiration date
Set a maximum time period for which a replic can be accessible.

- ☑ **Require expiration date**

Expiration date can maximally be
| Amount |
| Unit ▾ |
from the date of creation.

Replic limit
Set a limit for how many replics a user can create in a given timespan.
Note: This limit works only for users that are logged in. If anonymous users are allowed to create replics, the enforcement of this limit may not be possible.

- ☑ **Limit replic creation**

Allow creating
| Amount |
distinct replics per
| Unit ▾ |
.

Report configuration

Limit who can report replics
To prevent spam, set which users can report replics:

- ⦿ **All:** Every user can report replics
- ○ **Account:** Only logged-in users can report replics
- ○ **Verified:** Only users with a verified account can report replics
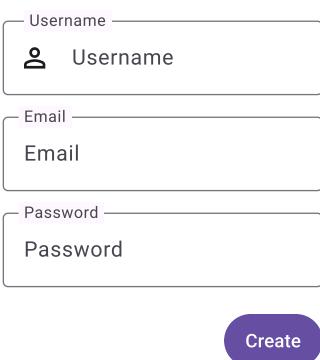

Account configuration

Allow account creation
Set whether accounts can be created by anyone. Disabling this options forbids users from signing up.

- ☑ Allow signing up

Create account
Create an account. This is useful when "Allow signing up" is disabled but you want to provide an account to a user. You can configure this account to not need to verify its email address.

- ☐ Require email verification
